

STOP OAK. AIRPORT EXPANSION

PROTECT CLIMATE, HEALTH
& COMMUNITIES

**More flights = more global heating,
more air pollution, more noise**

Oakland Airport is planning a 3rd terminal with 16 new gates

- The Port of Oakland has given a green light to the project without conducting a Health Impact Assessment as recommended by the Alameda County Public Health Department. Communities downwind of the airport already breathe some of the most severely polluted air in the state and have some of the highest rates of related illness.
- The proposed expansion would nearly *double* aviation greenhouse gas (GHG) emissions by 2038. Meanwhile scientists say we have to cut GHG emission in *half* by 2030 to have any chance of preventing climate collapse!
- Expanding OAK will not improve the Oakland economy or provide “good jobs;” Good jobs do not poison people and the planet. Studies have shown that airport baggage handlers breathe polluted air equivalent to a closed smoking room. Airport service workers are contracted with little healthcare and low pay.
